

Fly your rocket through l'espace!

Instructions: Cut out the rocket, vocabulary cards, and hint cards. Lay out the picture cards face up (perhaps on a black background!) The parent holds the hint cards and asks their child to fly to, **"Vole vers..."** (*VOHL vehr*), and reads one of the hints. Ex: **"Vole vers...une planète bleue et verte."** The student then pilots their rocket through space to the right card, saying the name when they arrive!
